

Numba SciPy2020 tool updates

Siu Kwan Lam

Becoming an expandable compiler

- More libraries using Numba, e.g.
 - Pandas 1.0
 - Awkward 1.0
- Massive refactoring effort
 - Reorganize code base → easier for new developers
 - Drop old Python and old NumPy support & hacks!
- Improved extensibility
 - setuptools entrypoints → autoloading extensions
 - composable pipeline passes → custom compilers
- Better error reporting system

Growing the community

- > 1.4 million PyPI downloads/month
- 78 contributors last year
- Monthly open developer meetings
- Discourse forum: numba.discourse.group
- Working on a governance model to encourage new contributors and maintainers

Numba makes Python code fast

Numba is an open source JIT compiler that translates a subset of Python and NumPy code into fast machine code.
